# About Company

Balmajid is a pioneering company specializing in integrative technology and system solutions.

We work with trusted global partners to ensure our clients receive the best value, reliability, and scalable solutions tailored to their unique business needs.

As a Reseller and System Integrator, we provide end-to-end services that combine IT infrastructure, General energy smart solutions—helping organizations achieve operational excellence, cost efficiency, and future-ready performance.

# Vision

At Balmajid, we aspire to be the foremost provider of comprehensive and innovative integration solutions, empowering organizations to achieve operational excellence, efficiency, and sustainable growth in a rapidly evolving digital landscape.

# Mission

Driven by excellence and innovation, our mission is to deliver superior-quality, end-to-end IT and General energy smart solutions while building long-term partnerships grounded in trust and performance.

We harness cutting-edge technologies, global expertise, and highly skilled professionals to create scalable, value-driven solutions that enhance productivity, inspire innovation, and support our clients' long-term success.

# Meet Our Team

At Balmajid, our team of highly skilled professionals combines technical expertise with a spirit of collaboration and innovation. Their dedication and experience are the foundation of our success, ensuring reliable solutions that consistently exceed our clients' expectations.

# Our Service

**IT Services:** At Balmajid, we deliver a full spectrum of IT solutions designed to meet diverse business needs and ensure performance, scalability, and security. Our expertise spans across:

## IT Infrastructure

We provide complete end-to-end IT infrastructure solutions — from planning and design to full implementation and delivery.

- **Data Centers:** Design and build integrated data centers with environmental systems, raised flooring, fire suppression, structured cabling, and full server and network integration.
- **Networking:** Supply, install, and configure high-performance wired and wireless networks, along with unified communications for seamless collaboration.
- **Structured Cabling Systems:** Design and implement copper and fiber-optic cabling for high-speed data transfer, efficient routing, and long-term reliability.
- **IT Hardware:** Provide and set up enterprise-grade servers, storage devices, workstations, and power systems (UPS and PDUs).
- **Physical Security Systems:** Deploy CCTV surveillance and access control solutions with centralized monitoring, analytics, and integration with BMS.

## Cybersecurity

We safeguard your digital assets through an integrated, multi-layered security approach. From assessment and strategy design to implementation and monitoring, we provide the latest hardware and software solutions to defend your organization against evolving cyber threats.

## Backup & Disaster Recovery

We ensure business continuity and data protection through secure, automated backup and disaster recovery systems for servers and storage, leveraging technologies from leading global vendors.

## IT Consultation & Managed Services

Our expert consultants assess IT environments, develop tailored strategies, and optimize operations. We also offer end-to-end managed services — including proactive monitoring, maintenance, and infrastructure management — allowing you to focus on your core business.

## Innovation & Value-Added Solutions

We help clients embrace innovation and digital transformation through software, automation, and analytics solutions that streamline workflows, integrate systems, and deliver insights to drive growth, efficiency, and competitive advantage.

**General energy smart solutions:** Balmajid is a full-service electrical and energy company providing turnkey and specialized contracting services locally and internationally.

## High Voltage Power Project Services

provides comprehensive services for energy, industrial, and electromechanical infrastructure projects across all execution phases — from bidding to completion. Our expertise covers cost estimation, technical and commercial contract review, risk assessment and mitigation, project planning and scheduling, cost control, and detailed design and component studies.

## High Voltage Transmission Substation Services (up to 500 kV)

provides end-to-end services for high-voltage substations, including design, construction, installation, testing, commissioning, and maintenance.

Our expertise covers key components such as power transformers, circuit breakers (outdoor & GIS), disconnectors, surge arresters, insulators, current and voltage transformers, and protection & control systems.

## High Voltage Power Transformer Services

provides complete installation, oil filling, testing, and commissioning for new power transformers up to 500 MVA, as well as oil purification and maintenance services for existing units.

## Medium Voltage Systems

We specialize in the design, construction, installation, testing, commissioning, and maintenance of medium-voltage systems, including switchgears, circuit breakers, CTs, VTs, and protection panels.

Our services also cover modernization and system upgrades to enhance performance and reliability.

## Substation Modification & Upgrading

delivers comprehensive modernization and rehabilitation solutions for substations, including protection and control panel upgrades, MV breaker retrofits, conversion of air breakers to vacuum types, LV circuit breaker replacements, and DC system renewals.

## Technical Consultancy & Engineering Services

provides expert technical consultancy and engineering solutions, including troubleshooting, case studies, equipment adequacy and sizing checks, FEED and detailed engineering, and secondary design for substations.

Our team utilizes AutoCAD, ELCAD, ETAP, and other professional tools to ensure accuracy and efficiency in every project phase.

## SCADA & Automation Systems

We design, install, test, and commission RTU and Substation Automation Systems (SAS) for new substations, while also upgrading existing RTUs with the latest technologies to enhance performance and reliability.

## Power Generation Services

We offers complete installation, testing, commissioning, and maintenance of gas, diesel, and steam turbines and generators.

We also specialize in overhauling and servicing turbines from various manufacturers to ensure optimal performance and operational life.

## Supply of Technical Staff

Our skilled engineers and technicians provide on-site support across all project stages — from execution to operation and maintenance — assisting clients during and after the warranty period with professional and reliable service.

## Telecommunication Systems

provides end-to-end services for telecommunication systems, including supply, design, installation, testing, commissioning, and maintenance of PLC, PDH, SDH, MPLS/TP, IP/MPLS, and protection signaling equipment (PSE).

We integrate and configure new telecom equipment with existing systems, including protection relays, and supply management systems for seamless operation.

## Training Services

We offer customized training courses for engineers and technicians on various equipment types and customer maintenance practices.

On-site practical hands-on training is delivered by experienced, bilingual instructors with strong engineering backgrounds.

## Smart Metering Systems

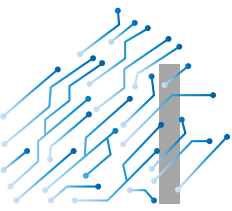

We designs, supplies, installs, commissions, and maintains smart metering systems for electricity, water, and gas applications.

We integrate meters with head-end systems (HES) and metering data management (MDM), including software development for remote reading and data processing across multiple manufacturers.

## Renewable Power Systems (Solar Energy)

provides design, supply, and installation of solar systems tailored to client needs, for applications such as remote gas stations and irrigation systems.

We also provide maintenance, troubleshooting, and consultancy services for both on-grid and off-grid solar systems, ensuring fast restoration and optimal operation.

# Why Choose Us

Balmajid stands out as a trusted partner due to our unwavering commitment to quality, customer satisfaction, and innovative solutions. We prioritize understanding our clients' challenges and aligning our services accordingly. Our reputation is built on trustworthiness, technical expertise, and a proven track record of successful project delivery.

We partner with global technology leaders and adhere to the highest international standards in every project.

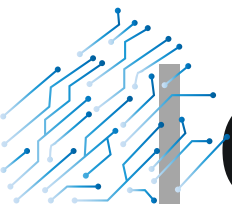

## Quality and Reliability

## Client-Centric Approach

We collaborate closely with our clients to understand their unique needs and tailor solutions that deliver tangible results.

From initial consultation and design to implementation, training, and ongoing maintenance, we are with you every step of the way.

## Comprehensive Supportability
